PROFILE

Final-year Software Engineering apprentice in full-stack development (.NET, C#, Vue.js) and Business Intelligence (Power BI, SQL Server, DAX), with hands-on experience in software design, database management, and data analysis. Targeting Software Developer, Database Manager, or Data Analyst roles.

EDUCATION

- Computer Engineering Program – CNAM Engineering School

Advanced algorithms, SOLID, TDD, Business Intelligence, information systems, project management, AI

Eckbolsheim

2023 – Present
- BSc in Computer Science – CNAM Grand Est

Writing and defense of a professional report

Strasbourg

2022 – 2023
- DUT in Computer Science – Scientific track – IUT Robert-Schuman

Software design, image processing, AI, supervised project

Illkirch-Graffenstaden

2020 – 2022

PROFESSIONAL EXPERIENCE

- Apprentice Software Engineer – Safran Landing Systems

Work-study program – SLS Information Systems

– Develop and maintain information system applications supporting MRO (Maintenance, Repair & Overhaul) France operations.

– Design and deploy Power BI dashboards backed by SQL Server views and DAX measures.

– Train business teams on data warehouse tools and contribute to information systems project management.

Molsheim

Sept. 2023 – Present
- Software Engineering Intern – Safran Landing Systems

International mobility

– Mapped the site's application landscape and enterprise architecture in LeanIX (SAP).

Gloucester, United Kingdom

Aug. – Oct. 2025
- Developer Intern – LPB Conseil

10-week internship

– Developed Power BI dashboards and maintained ERP software.

Strasbourg

Apr. – Jun. 2022

FINAL-YEAR PROJECTS (SAFRAN LANDING SYSTEMS)

- OptiPlanif – Redesign of MRO Supply Chain Planning

Power BI / SQL Server / DAX

– Replaced the legacy planning system with a Power BI reporting solution backed by SQL Server views.

– Modeled business rules (BPMN, Draw.io) and designed the underlying data architecture.

– Deployed to production for the MRO France Supply Chain.

Molsheim

2024 – 2026
- Vérac – Application portal and access management for MRO France

.NET 10 / Vue.js / LDAP / GitLab CI/CD

– Built a layered Clean Architecture (domain, business, data access, API, client) with dedicated test projects.

– Integrated Windows/SSO authentication, querying Active Directory via LDAP and SQL Server.

– Applied test-driven development (TDD) and set up a GitLab CI/CD pipeline.

Molsheim

2025 – 2026

ACADEMIC PROJECTS

- SMART – Product recognition using computer vision

Python / Computer Vision

– Built automatic recognition of a predefined set of products.

Mar. 2025
- TaxiBrousse – Internal carpooling application for Alcatel-Lucent Enterprise

Android Studio

– Developed a mobile carpooling app (similar to BlaBlaCar) for internal company use, with backend hosted on Vercel.

Jan. 2025

TECHNICAL SKILLS

Languages: C/C++, C#, Python, SQL, T-SQL, LaTeX
Frameworks: .NET, ASP.NET Core, Vue.js, Entity Framework Core
Data & BI: SQL Server, Power BI, DAX, ETL, Data Warehouse, Data Modeling, Reporting
Practices: OOP, SOLID, Design Patterns, Clean Architecture, TDD, CI/CD, Git
Tools: Visual Studio, VS Code, GitLab, GitHub, LeanIX, Microsoft Office, Access
Domains: Software Development, Web Development, Business Intelligence, Database Management, Data Analysis

LANGUAGES

French: Native
English: Fluent – professional use (mobility in the United Kingdom)
German: Basic knowledge

HONORS & INTERESTS

- Nuit de l'Informatique 2021, 2023, 2024, 2025 – Gold medal on a challenge (2024 edition)

Dec. 2024
- AWS GameDay Frugality Fest
- Hobbies & sports Cinema, literature, digital creation – Running
